

# FLOW

Premium Biocompatible Resins  
for Long-Term Provisionals

Class II Certifications

## FLOW C&B

A low viscosity resin that produces long-term restorations high in mechanical strength, aesthetics, and radiopacity.

- Resin specially formulated for **minimal polishing** when cleaned with alcohol
- Exceptional print results that are **easy to characterize**
- Available Shades: **Bleach, A1, A2, A3**

## FLOW Hard Splint

Create transparent splints that offer exceptional durability and comfort for extended wear.

- High **UV stability** provides great resistance to fracture and warping
- Tasteless, odorless, and sterilizable
- Available in **Clear Transparent**

## FLOW Denture

Deliver stunning long-term provisionals that provide outstanding patient comfort.

- **Anti-shrinkage** formulation that guarantees a clinically **precise fit**
- Engineered for **minimal polishing and post processing**
- Available in **Orange Pink**
